Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: The specification is replete with problems concerning with idiomatic English. Appropriate correction is required.

Claim Objections

2. Claims 4-12 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-12 have not been further treated on the merits.

Claim Rejections - 35 USC § 112

3. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors; and

The claims are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a

complete operative device. Claims and specification should be revised so as to conform with U.S. practice.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Welsch (prior art cited by applicant). The structure as claimed is fully anticipated by Welsch. In particular, Welsch shows in Fig. 3 a jet burner for gaseous fuels comprising at least two different surface areas, wherein one or several first surface areas (11) are permeable for the fuel, whereas one or several second surface areas (10) are impermeable for the fuel.

6. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Komune (Japan Pat. 60-178208). The structure as claimed is fully anticipated by Komune. In particular, Komune shows in Fig. 2 a jet burner for gaseous fuels comprising at least two different surface areas (3,4) wherein one or several first surface areas (3) are permeable for the fuel, whereas one or several second surface areas (4) are impermeable for the fuel.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Each of Morris and Cooper is cited to show a gas burner comprising ceramic foam.
